

# 3 Paths to LSI Certification

# FLS Exam and LSI Certification Requirements

If you submit an application without prior submittal and approval of a pre-application form and you do not meet the licensing requirements of this State, your application will not be returned and your fees are non-refundable.

## Education and Experience Requirements

BS degree	Experience after passing exam
Land Surveying	none
Related to Surveying (includes 15 semester hours or 22.5 quarter hours of survey courses)	2 years
Related Science (must have 30 semester hours or 45 quarter hours of a combination of math and basic sciences)	4 years

**If you are a non-graduate, you need to complete the LS application. You are not eligible for LSI Certification.**

**First time Applicants** with a BS in Surveying or a degree other than surveying submit the following items:

- application for land surveyor intern with all questions answered
- application fee

**Re-exam applicants** submit the following items:

- application with only questions 1-12 and 15 completed
- re-exam fee

## LSI Certification

You must submit the following in order to be certified:

- Transcript directly from the college/university showing degree and date received
- Supplemental experience record (if experience is required)
- Experience verification (if experience is required)

All information for certification must be received in the Board office by the agenda deadlines of the next board meeting.

## Experience Requirement for those who do not have a Surveying degree

All experience must be verified by LS Supervisors or Associates who were licensed prior to the time being verified.

The Board's policy on experience prior to graduation is that you must have been in a formal co-op program through the school or it took you 6 years or longer to receive your degree and you were working gaining land surveying experience under a PLS. The maximum credit the Board will consider is 6 months. Experience must be verified by a PLS in order for the Board to review.

You will receive one years credit for a MS or PhD in land surveying in a program whose undergraduate or graduate degree is accredited by ABET or 2 years for a MS and PhD in land surveying. If you were working and going to school at the same time, you cannot get credit for your degree and the experience. You will get credit for one but not both.
